Temperature Blend Door Actuator — RH, Dual-Zone EATC

Removal and Installation

**NOTE:** It is not required to install the new RH temperature blend door linkage parts included in the RH temperature blend door actuator service part kit if only the temperature blend door actuator requires replacement and the linkage parts are not broken or binding.

**RH temperature blend door actuator and linkage**

1. Remove the 2 glove compartment retainer pins.

2. Remove the glove compartment.
   1. Detach the glove compartment damper from the glove compartment.
   2. Release the stops by pressing them toward the center of the glove compartment while lowering the glove compartment, and remove the glove compartment.
3. Remove the RH lower instrument panel insulator.

4. Remove the 3 RH temperature blend door actuator screws.

5. Disconnect the RH temperature blend door actuator electrical connector.

6. Remove the RH temperature blend door actuator.

7. Manually operate, and inspect the RH temperature blend door linkage for incorrect placement, binding or damage.

**RH temperature blend door actuator linkage only**

8. Detach the 2 retaining tabs and remove the RH temperature blend door linkage.

**RH temperature blend door actuator and linkage**

9. To install, reverse the removal procedure.
